

Lightning Surge Protectors for Electronics Equipment M-RESTER

LIGHTNING SURGE PROTECTOR FOR POWER SUPPLY USE

(20 A)

Functions & Features

- Designed specifically for power requirements of medium capacities (20 amps)
- Protecting electronic equipment from lightning surges that enter through power supply circuits
- Discharge current capacity 10000 A
- Surge absorber failure indicated with LED
- Detaching the discharge elements from the power supply circuits when fuses are blown

Typical Applications

- Computers and other electronic devices
- Control and telemetering systems

GENERAL SPECIFICATIONS

Construction: Stand-alone; terminal access at the front

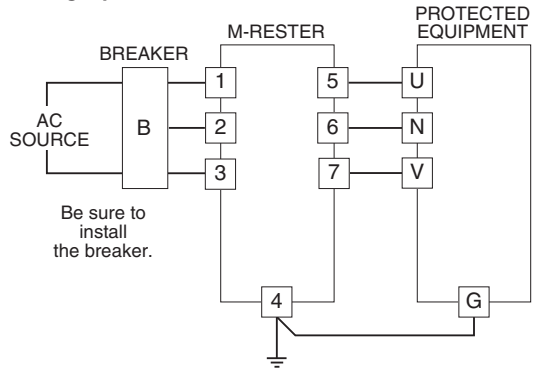

Connection: M4 screw terminals (torque 1.6 N·m)

CONNECTION EXAMPLES

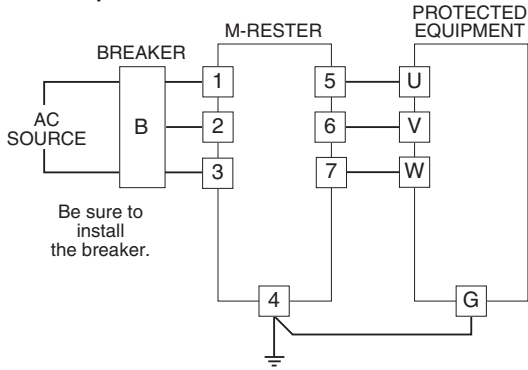

■ Single phase 2-wire

■ Single phase 3-wire

■ Three phase 3-wire

GROUNDING

A crossover wire between M-RESTER ground and ground or metallic housing of equipment is required for protection.
If the protected equipment has no ground terminal, ground the M-RESTER only.
