Lightning Surge Protectors for Electronics Equipment M-RESTER

LIGHTNING SURGE PROTECTOR FOR STANDARD SIGNAL LINE & PULSE USE

(life monitor, 48 V or 65 V DC line voltage)

Functions & Features

• Designed specifically for 4 – 20 mA DC and pulse signal line including both 4-wire and 2-wire transmitters

• Absorbs surges only without affecting instrumentation signal

• Life monitor function helps you to decide when you should replace the surge protector; reduces maintenance and prevents downtime

• LED display and alarm contact output indicate the degradation and life span of the surge protection circuits

GENERAL SPECIFICATIONS

Construction: Plug-in

Connection: M3 screw terminals (torque 0.8 N·m)

Housing material: Flame-resistant resin (black)

Alarm indicators

PWR: The green LED turns on while the power is supplied.

ALM: Tricolor LED (green/amber/red)

· Remains off when the power supply is first turned on.

· Green: The unit has received one or more surges.

· Amber: Replacement is recommended.

· Red: The life span has ended.

Degradation judged: When the leakage current at the voltage limiter exceed approx. 7.5 μA.

Life time judged: When the number of discharges of the discharge element reaches the expected life span.

Alarm output: The N.C. contact is on when the life span of the discharge elements has ended, when the voltage limiter has degraded, and/or when the power supply is removed.

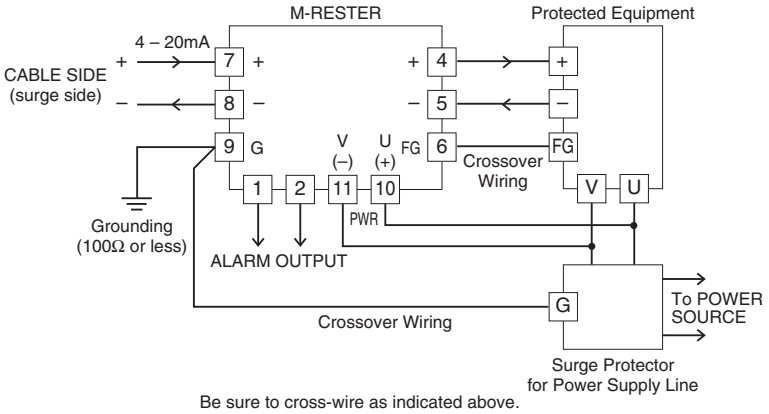
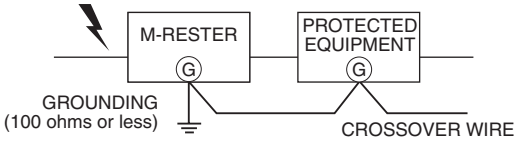
CONNECTION EXAMPLES



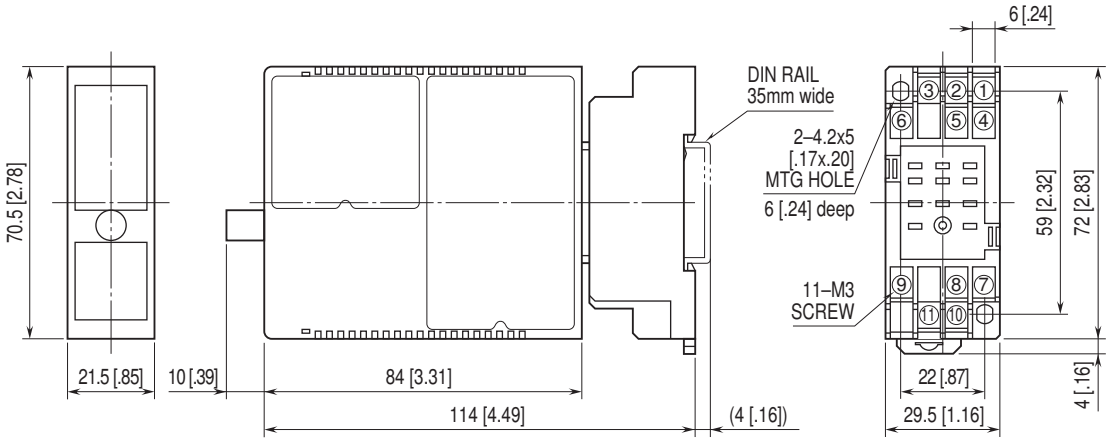
Be sure to cross-wire as indicated above.

GROUNDING



A crossover wire between M-RESTER ground and ground or metallic housing of equipment is required for protection.
If the protected equipment has no ground terminal, ground the M-RESTER only.

EXTERNAL DIMENSIONS & TERMINAL ASSIGNMENTS unit: mm [inch]



• When mounting, no extra space is needed between units.
