

Final Control Elements

MINI-TOP ELECTRONIC ACTUATOR

(rotary type; CC-Link)

Functions & Features

- Compact control valve actuator (drive unit) that can be connected directly to CC-Link equipped PLC
- Wiring cost can be reduced with the single cable daisy-chain connection
- Can be used along with other CC-Link devices on the same cable
- Information readable via CC-Link
- The information read is available for the maintenance and checking of valves and Mini-Top Electronic Actuator
- 1/1000 high-resolution type
- Angle adjustment in fully closed and open stop positioning is easy with the built-in electronic limiter
- Built-in overload protection

Typical Applications

- Actuator for automatic control valve in pilotplants
- Air-conditioning in buildings or plants
- Micro-flow control for pharmaceutical injection
- For small-size control valves
